

PENTAS3 BRAND IDENTITY & STYLE GUIDE

1. VISUAL IDENTITY: THE COLOR PALETTE

The colors should evoke the feeling of a "Theater in your pocket." We move away from the "cheap" bright colors of social media toward a "Premium Cinematic" aesthetic.

COLOR NAME	HEX CODE	PSYCHOLOGY & USAGE
Pentas Crimson	#BE1E2D	Passion & Drama. The primary brand color. Evokes the red velvet curtains of a theater and the intensity of "Melodrama."
Midnight Stage	#0F0F0F	Premium Depth. Used for backgrounds. It makes the video content "pop" and signifies a high-end streaming experience (similar to Netflix).
Nusantara Gold	#D4AF37	Success & Heritage. Used sparingly for icons, "VIP" badges, and buttons. It adds a touch of "Premium" and royalty.
Clarity White	#F5F5F5	Readability. Used for primary text on dark backgrounds to ensure clean, modern UI/UX.

2. PITCHING DECK BRANDING DESIGN

To attract investors, the deck must look like a high-tier tech product while celebrating its cultural roots.

Slide Layouts & Visual Metaphors

- **The "Spotlight" Layout:** Use a dark background (#0F0F0F) with a soft red radial gradient in the center. Place key figures or text in the "light" to focus investor attention.
- **Vertical Frame Overlays:** When showing data or features, use a mobile phone mockup (9:16 ratio) showing a dramatic scene. This reinforces the "mobile-first" nature of the business.

- **The Red Thread:** Use a thin, elegant red line (Pentas Crimson) that travels across slides, connecting the "Problem" to the "Solution"—symbolizing the narrative thread of our dramas.

Graphic Elements

- **Icons:** Use "Outline" style icons in Nusantara Gold. Keep them thin and sophisticated, not chunky or cartoonish.
- **Charts:** Use Crimson for the growth lines and Gold for the goal points. Never use green/blue; stay within the brand palette to maintain the "Theatrical" mood.
- **Image Treatments:** Apply a subtle dark vignette to all images of actors/scenes to make them feel like high-budget cinema stills rather than social media photos.

Typography Hierarchy for Slides

- **Headlines:** Montserrat Bold | All Caps | Tracking: +50 (spaced out) | Color: Clarity White.
- **Sub-headlines:** Playfair Display Italic | Color: Pentas Crimson.
- **Body Text:** Inter Regular | Color: Clarity White (80% Opacity).

3. VISUAL LAYOUT PRINCIPLES

- **Imagery:** Always use vertical (9:16) frames with high-contrast lighting. Faces should be expressive and fill the frame to create an immediate emotional connection.
- **Negative Space:** Keep slides breathable. A premium brand doesn't clutter. If a slide has a lot of text, break it into two.
